***Detailed Action***

***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance: Regarding claims 1 and 30, the prior art does not teach or render obvious a member having a portion adherent by stiction to a surface of the substrate and a means for monitoring a temperature of the portion of the member, the means for monitoring a temperature of the portion of the member controlling an output signal to indicate a pressure of a gas to which the pressure sensor is exposed.

Regarding claims 11 and 35, the prior art does not teach or render obvious a pressure sensor wherein a member comprises a generally linear elongated bridge supported above the substrate at either end, the bridge having a central portion collapsed onto and adhering by stiction to a surface of the substrate.

The following is a statement of reasons for the indication of allowable subject matter: with regards to claim 13, the prior art does not teach or render obvious a composite pressure sensor comprising a means for monitoring a temperature of a member of a second member of a second pressure sensor connected between the second input point and the second output point, the first resistor connected between the first input point and the second output point and the second resistor connected between the second input point and the first output point.

The following is a statement of reasons for the indication of allowable subject matter: with regards to claim 37, the prior art does not teach or render obvious a
